Recruitment Consultant - Finance into NFP - West End - £40000 + commission + benefits

My client is a market leading, public and not-for-profit sector, specialist recruitment consultancy. Established since 2000, they recruit at middle management to executive level in the fields of finance, HR, procurement, commissioning, marketing and communications. They work with over 500 organisations annually and have over 40 consultants working from their London office, based in Central London.

Due to expansion, they are seeking an experienced Recruitment Consultant to join their established Finance division, recruiting part qualified and qualified accounting and finance professionals on an interim basis into PSL clients across the NFP sector.

The successful candidate will be joining an established team. The client base is established with strong existing relationships in place but does have scope for further development and you will be able to network and leverage off existing relationships.

The successful candidate will have interim accounting and finance recruitment experience, be a strong networker and able to build good working relationships with clients and candidates. This is a superb opportunity working for a fantastic business. In return they will offer an attractive salary, commission structure, ongoing training and excellent benefits
