Senior Recruitment Consultant - Accounting and Finance - City - £32000 - 40000 + commission + benefits

Great opportunity for an experienced Senior Recruitment Consultant to join a high performing Financial Services division. My client is a market leading recruitment consultancy, focusing on mid to senior level professionals in the Financial, Insurance and Professional Services sectors. Operating across specialist disciplines, they are the preferred supplier of a number of major international groups and smaller firms alike. Having grown organically, they currently have over 100 staff in global offices.

This is a great opportunity for an experienced Recruitment Consultant to work as part of a successful team/division. You would be recruiting Accounting and Finance candidates at salaries from £50k – 100k+ into the Asset Management, Private Equity space. The desk to date has predominantly been Banking and Insurance focused and more recently they have made inroads into the Asset Management space. There are plenty of contacts / leads but really need someone to focus on this market and develop it to its full potential. There is a ready made market to tap into so it is a warm desk.

The division is 18 consultants at varying levels of experience. They focus on mid to senior level roles and there is a collegiate culture in place with the sharing of information. It is a down to earth, adult and flexible working environment with minimal KPIs and regular team socials.

This is an exciting and rewarding time to join a growing team and take ownership of your career. The successful candidate will be an experienced Accounting and Finance Recruitment Consultant, someone ideally who has recruited into Financial Services. If you have a track record in recruitment, a good billing record and are confident building relationships with clients and candidates then please don't hesitate to contact me. You will be rewarded with a competitive basic salary, commission structure, benefits, incentives and a structured career path.
