Recruitment Consultant - A&F into C&I, Contracts - City - 28000 - 35000 + commission

Superb opportunity for an experienced recruiter to join the C&I Finance, Contracts team.

This role is to join a leading recruitment business in the London, regional and international markets. My client has been established over 20 years', they have 600 people working in 24 offices across 10 countries and they operate across 8 core markets including Accounting and Finance. The London office is state of the art, extremely impressive and based in Central London. They offer rewarding, long term careers.

Currently they are looking to hire an experienced Consultant to join the Contracts team, recruiting Accounting and Finance candidates on an interim/contract basis into a mix of PSL and new business clients across Commerce & Industry. The team is currently 2 consultants, job flow is good and both are billing consistently. You will be part of a wider Accounting and Finance division where there is a great team vibe, everyone is competitive, wants to do well but they all support each other. They have a great back office function who will do all the referencing, admin and dealing with payroll queries and therefore freeing up your time to recruit.

The ideal candidate will be a Recruitment Consultant with experience recruiting accounting and finance candidates on an interim/contract basis however if you are a contract recruiter from another sector, willing to crossover into accounting and finance, then that will work too. You will be confident, able to build relationships with clients and candidates and have a decent track record of billings.

Why join? They will offer a mature working environment, they have a well networked client and candidate base and they have a culture of learning, offering excellent training and development tailored to your individual needs.

They will offer a competitive salary, attractive commission and they have a flexibens fund too. There is dress down every Friday and there are additional incentives including flexi hours and working from home. This is a superb business for anyone wanting to develop their career.
